

L'ANONYME

MOVE

This project's overall goal is to prevent the transmission of HIV and other STBBIs among 14 to 35-year-olds in Montreal. Move aims to promote safe sexual behaviors and reduce barriers to access to sexual health care for Afro-descendant and/or 2SLGBTQIA+ individuals, considering their specific realities.

TARGET AUDIENCE

14 to 35 years old

TOPICS COVERED

Sexuality · Myths · Screening · STBBIs ·
Protection methods · Sexual health

DURATION

90 to 120 min /
workshop

WORKSHOPS

DESCRIPTIONS

Myths and sexuality

The workshop discusses the various dimensions of sexuality to promote a global understanding of it. Several myths, realities, and stereotypical beliefs about sexuality, HIV, and STIs are explored and deconstructed. Participants are also encouraged to reflect on the impact that negative representations of STBBIs can have on their prejudices.

Protection and screening

The goal of this workshop is to improve young people's knowledge of how STBBIs are transmitted, possible symptoms, treatments, means of protection, and barriers and motivations for screening, in order to encourage safer behaviors.
